### Shopix - Ecommerce Website

**Live Demo :** <https://shopix-ecommerce-app.netlify.app/>

**Description:** This ecommerce app, built with React.js and Tailwind CSS, allows users to browse separate categories for men and women and use a search bar to find specific products. Users can add items to the cart, remove items, and view the total price. The app also suggests related products and includes a simple checkout form.

### Budget App

**Live Demo :** <https://budget-application-react.netlify.app/>

**Description:** This is a simple budget app built using React. It allows users to add different budgets, add expenses to the current budgets, display all budgets, display expenses, delete budgets & expenses, and offers functionality to get total budgets and expenses.

### Crypto App

**Live Demo :** <https://crypto-application-react.netlify.app/>

**Description:** This app utilizes cryptocurrency APIs to provide real-time data and features three main pages: Crypto, Trending, and Saved. The Crypto page displays a list of cryptocurrencies, the Trending page highlights the most popular coins, and the Saved page allows users to save their favorite coins. The application also includes functionalities like concurrent search, pagination, and sorting.

### Homeverse - Real Estate Website

**Live Demo :** <https://react-real-estate-website.netlify.app/>
